Intelligent iSCSI Storage Arrays

The Dell difference

Ease of use

- Intelligent, automated management
- From box to operating SAN in minutes
- Monitor petabytes of storage across dozens of SANs from a single console

Enterprise performance

- Exceptional performance for both sequential and transactional applications with linear scalability
- Automated, real-time load balancing across drives, RAID sets, connections, cache and controllers
- Pooling capability enables appropriate service levels for individual applications

Reliability

- Fault-tolerant, fully-redundant dual controller design for no single point of failure
- Designed for 99.999% availability
- Enterprise-class RAID protection (RAID 5/6/10/50)
- Hot-swappable components, flexible online redeployment of arrays

Scalability

- Modular design allows growth when needed
- Online expansion between hardware generations
- Linear scalability—scale capacity and performance together
- Manage a growing pool of storage from one single user interface
- Thin provisioning to increase space efficiency for optimal capacity utilization
- Expand overall group capacity by mixing pools of 6000 and 6500 arrays

Affordability

- All-inclusive enterprise features and functionality with no additional software licenses to purchase
- Easy connection via iSCSI
- Automated features help to eliminate highly specialized administrative costs
- Adopt 10GbE and run both 1GbE and 10GbE in the same environment without de-valuing legacy equipment
- EqualLogic SANs have the lowest TCO of common storage array architectures—fully 1/3 to 1/2 the total cost of competitors over a five year period¹

Enterprise Efficiency

- Addition of 10GbE supports high-performance, high-bandwidth applications such as data warehouses and streaming media
- Maximize your IT investments with an end-to-end unified fabric encompassing servers, EqualLogic storage and Networking
- Enterprise level virtualized storage that matches virtualized server environments
- Support for multi-tiered application designs with automated tiering of hybrid models (6000XVS & 6010XVS)
